

The Indiana Department of Education Office of School and Community Nutrition is Serving More than Meals to Hoosier Communities

The Office of School and Community Nutrition (SCN) consists of 33 employees covering a variety of critical support functions. These include School Nutrition Program Monitoring, School Nutrition Programs Training and Application, the Child and Adult Care Food Program (CACFP), and Food Distribution and Nutrition Program Finance are responsibilities.

The School Nutrition Team is kicking off a busy summer season with the start of the Summer Food Service Program this week. More than 25 sponsors are expected to participate this year, providing 1,266 meal sites to low income children across Indiana. The majority of our sponsors are schools and additional sponsors are always needed. If your organization is interested in becoming a sponsor next year, please contact [Tina Skinner](#).

In addition to providing meals to Indiana youth, SCN is also offering a variety of training resources during the summer. Eight sessions of Culinary training will be held at four locations across the state. “Charting your Course,” our Back to School Workshop, will be offered on July 25 at Ivy Tech Indianapolis. Orientation to School Nutrition Management will be presented in December. Information regarding upcoming training opportunities and how to register are located on the SCN [training page](#).
